♟ CodeChef   ▮ Codeforces   ⛵ LeetCode

CAREER OBJECTIVE

Software Engineer with a track record of leading impactful projects and collaborating effectively with cross-functional teams. Committed to driving innovation, enhancing user experience, and continuously honing skills through competitive programming and lifelong learning. Focused on delivering timely, high-quality results, I aim to contribute meaningfully to a dynamic, growth-oriented organization.

WORK EXPERIENCE

Fair Electronics Ltd. (Fair Group) – Software Engineer   10/2024 – present | Dhaka, Bangladesh

Developed the Dealer Booking System, a production-level platform with Next.js (frontend) and Laravel + Inertia.js + React (backend).

- User Portal (Next.js): Built dealer-facing portal with API integration for order placement, cart, search/filter, pagination, PDF export, and secure onboarding. feldms.vercel.app ⧉
- Admin Panel (Laravel + Inertia.js + React): Implemented order approval, invoice generation, campaign management, CSV bulk uploads, role-based access, and sales/reporting dashboards. dealer.fairgroupemployeeoffer.com/login ⧉
- Ensured seamless API integration, database management with MySQL (Laragon), version control (GitHub/GitLab), and testing (Postman/Thunder Client).
- Delivered under strict deadlines, achieving a scalable and client-approved live system.

Techno Bangla – Programmer Intern   04/2024 – 09/2024 | Dhaka, Bangladesh

- Led development of an Inventory Management System using React.js (frontend), Node.js (backend), and MySQL.
- Ensured seamless front-end/back-end integration by implementing ORM techniques and leveraging Git for collaborative development.

SKILLS AND TECHNOLOGIES

Programming Language
C, C++, Python, PHP, JavaScript

Front-end
React.js, Next.js, HTML, CSS, Redux

Back-end
Node.js, Express.js, Laravel (Inertia.js)

Databases
MySQL, MS SQL, Firebase, Oracle

Tools & Platforms
Git, GitHub, GitLab, Postman, Thunder Client, VS Code, Xampp, Laragon, Google Colab, NetBeans, PyCharm

Others
RESTful API development, ORM (Object-Relational Mapping), Competitive Programming (500+ problems solved on various online judges including CodeChef, Codeforces, and Leetcode), Artificial Intelligence, Machine Learning, and proficiency in AI tools

EDUCATION

Bachelor of Science (B.Sc) in CSE,   2019 – 2023 | Dhaka, Bangladesh
Ahsanullah University of Science and Technology ⬀
- CGPA 3.383 out of 4.00

PROJECTS

SalesForce, *Sales Management System*
A Salesforce-based system for managing sales processes, integrated with inventory and order modules for real-time tracking. Built with Salesforce, React, Node.js, and MySQL [**Link** ⬀]

HR Management System, *Next.js Frontend*
A Next.js-based HR portal that lets admins manage employee records, attendance, leave and allowance approvals, while employees can view their profiles and submit requests.Built with Next.js **[Link** ⬀ **]**

AuthGuard, *Email Verification and Reset Password*
This project is a React and Node.js based authentication system with MySQL, implementing email verification and password reset via OTPs generated and sent using Nodemailer **[Link** ⬀ **]**

GrabOut, *Online Restaurant Management System*
GrabOut is an online restaurant management system built with HTML, CSS, JavaScript, and PHP, enabling users to view menus, order, and book tables, while granting admins control over all aspects [**Link** ⬀]

SiTaERa's battleGround, *iGraphics Project*
This Action-Indie Survival fighting game, developed in C++ with Microsoft Visual Studio, features players battling ten tough monsters across ten devastating scenarios [**Link** ⬀]

Expert Assist, *Online Service Provider*
This website, built with HTML, CSS, JavaScript, and PHP, connects service providers and users in Bangladesh, facilitating expert hiring and seamless payments [**Link** ⬀]
